**IEQAS(INTERNATIONAL EDUCATION  
QUALITY ASSURANCE SYSTEM)**  
TONGMYONG IS INSTITUTION ACCREDITATION BY  
THE MINISTRY OF EDUCATION REPUBLIC OF KOREA

**INDUSTRY-ACADEMIC PRACTICAL  
EDUCATION PRESTIGIOUS UNIVERSITY,  
TONGMYONG UNIVERSITY TALENT AWARD.**

University for  
Applied Industry-  
Focused Education

Professional  
Education

Lifelong Learning

Global Talent

A Spirit of  
Service

Tu cultivates talented graduates with the ability to understand and analyze the world objectively through the acquisition of creativity and broad-ranging knowledge that goes beyond mere classroom study.

By honing expert knowledge and skills, TU cultivates creative professionals who can continually develop new skills and create new knowledge while faithfully fulfilling their duties and solving the problems of the present day.

whenever and wherever, TU cultivates life-long learners who can continually develop their own potential, making a lifestyle of learning while they work and working while they learn.

Through foreign language learning, computer literacy, understanding of world cultures, and expert knowledge and skills, TU cultivates global citizens capable of living and working in any environment in our global village.

Through the knowledge and skills a Tu education imparts, TU cultivates graduates as intellectuals, professionals, life-long learners, and global citizens with a dedication to public service for the shared prosperity of the community, the nation, and the world.

UNIVERSITY**

# WELCOME TO BUSAN

**The 1<sup>st</sup> Trade Port &  
The 2<sup>nd</sup> Largest City  
in South Korea**

Busan, the tip of the Korean Peninsula which faces the Southeast, Eastern and Southern seas, is known as a famous international city for its sea festivals and beaches.

Tongmyong University is located within sight of the Gwangan Bridge, representative landmark of Busan City.

## WHY TONGMYONG

01

### 2021 EMPLOYMENT RATE : 61.8%

- Top rank among the all universities in nationwide
- Continually increasing support for international student employment programs

02

### National Support

#### Enterprise - 47.4 billion won

- LINC 3.0 ("Leaders in Industry-University Cooperation" Program)
- Ministry of Education's University Innovation Project (For the Cultivation of Future Talent)
- Educational Leader for the 4th Industrial Revolution
- National Program of Excellence in Software
- Overseas employment program by HRDK
- Language exchange program "Blue Ladder"

03

### Systemic Support Program for International Students

- Country-specific 1:1 Counseling Program for International Students (Vietnam, China, Uzbekistan, et al.)
- Tutoring Program alongside Korean TU students
- Tongmyong Global "Bobusang" Program

04

### TONGMYONG in Worldwide

- Partnerships with 260 universities in 30 countries
- Exchange program, 2+2 education, Korean language & study tour, etc.

05

### South Korea's International Education Quality Assurance System (IEQAS) Program

- Until 2023.02  
(Undergraduate and Postgraduate program)

## Contents of operation

### Professional Korean education

- Classes by level that accurately evaluated the learner's level through the Level Test
- Customized step-by-step (Step 1 to Step 6) learning in consideration of the learner's level
- The Korean Language Institute of TongMyong University aims to enhance communicative skill with integrated education and functional education

### Professional Korea instructors

- Professional instructors with Ph.D. enrolled or higher in the field of Korean language education
- Instructors with more than two years of experience and skills in Korean language education
- Conduct 1:1 interviews that actively reflect learners' needs

### Educational environment

- Classroom operation with multimedia education environment
- Operation Global lounge for interaction among students

### Korean culture and Field trip

- Explore a historic scene of Korea
- Various Korean cultural experiences and practical training

# Korean Language Institute

The Korean Language Institute of TongMyong University is a Korean language education institution established to educate Korean to overseas Koreans and foreigners who do not speak Korean as their mother tongue. TongMyong University has been providing Korean language education since 2003, developed various programs and textbooks for Korean language education, and secured professional teachers.

The Korean Language Institute of TongMyong University is operated for four semesters in spring, summer, autumn and winter, and supports various cultural experience programs and club activities for students. In particular, for students who are aiming to go to university, we are running a college admissions counseling program, a Korean language and academic helper system, and special classes for the Test of Proficiency in Korean (TOPIK). In addition, we have signed an agreement with the Multicultural Family Support Center for the local community, and are developing and supporting various programs for marriage immigrants and children of multicultural families.

The Korean Language Institute of TongMyong University will open the way to the world for university students, local residents, and foreigners visiting Korea through scientific, systematic and specialized Korean language education and Korean culture education. We also promise to do our best to help them achieve with their successful future dreams.

Thank you.

# 2<sup>nd</sup> Semester, 2022 TONGMYONG

### 3. Required documents

Section	Documents
1. Essential	[1-1] Application from (including personal statement, Research plan for Doctorial applicants)
	[1-2] Passport copy
	[1-3] Color photograph 3 copies (passport photo: 3.5cm×4.5cm/white background)
	[1-4] ROK Alien Registration Card copy (in case of registered domestic resident)
	[1-5] For overseas residents, TB Test Result(chest X-ray examination) - submit after acceptance
	[2-1] Parents' ID card (or passport) copy (notarized in English if it is not in English)
2. Nationality	[2-2] Family Relations Certificate with parents (notarized in English if it is not in English)
	[3-1] Language test result (TOPIK, IELTS, TOEFL, TEPS)
3. Language	[3-2] For the applicants who fail to meet the language standard, <b>Recommendation Letter from the principal professor</b> of the department for this school
	[4-1] Certificate of the Bachelor's degree graduation (or expectant graduation)(notarized for Academic Certification*)
	[4-2] Transcript of the Bachelor's degree course (notarized in English if it is not in English)
	[4-3] Certificate of the Master's degree graduation (or expectant graduation)(notarized for Academic Certification*)
	[4-2] Transcript of the Bachelor's degree course (notarized in English if it is not in English)
	[4-5] Research plan (including Career and Research performance) - prescribed form
	[4-6] For the applicants applying to the major different from master's degree course, <b>Recommendation Letter from the principal professor</b> of the department for this school
4. Educational background	* Academic Certification documents must be notarized as one of the following ①~③ (For the school in China only ③ is acceptable) ① Documents with Apostille notarization ② Documents must be - confirmed by Korean Consul in the country where the school is located or - notarized by Consul in Korea from the country where the school is located in ③ For the schools in China, Verification Report of Education Qualification Certificate issued by China Higher Education Student Information and Career Center of the Ministry of Education of China is acceptable. In case of vocational high schools which are not available to issue the Verification Report above, document must be notarized as one of the following. A. Certificate of Graduation issued by the Department of Education of Province must be confirmed by the Korean Consul in China. B. Certificate of Graduation issued by the vocational school must be notarized by the Department of Education of province(city) and confirmed by the Korean Consul in China. C. If the vocational school is affiliated with the Ministry of Human Resource and Social Security(MOHRSS) of China, the Certificate of Graduation issued by the school must be notarized by the MOHRSS and be confirmed by the Korean Consul in China.
	[5-1] Certificate of bank balance copy (submitted separately: submission schedule will be notified individually) ① Overseas residents - Certificate copy of applicant or financial guarantor** - Balance amount USD 18,000 or more / maintain the balance until Sep.1, 2022 - Issued within 30 days of visa application date (If there's an expiration date, it is recognized up to 6 months) ② Domestic residents - Original certificate in applicant's name at the bank in Korea - Balance amount USD 9,000 (KRW 11,000,000) or more
	Additional documents for overseas residents [5-2] Proof of employment or Certificate of career of applicant or financial guarantor** (company name, tenure and position must be included) [5-3] Proof of income of career of applicant or financial guarantor** (annual or monthly salary must be included) ※ Notarized in English if it is not in English
	** Financial guarantor : Only parents of applicants are acceptable
5. Financial	

### 4. Application schedule

Progress	1st Application	2nd Application	Note
Application submission	May 2 ~ June 10, 2022	June 27 ~ July 8, 2022	Mail / Email
Screening	June 22, 2022	July 20, 2022	Inform individually
Admission result notification	June 29, 2022	July 27, 2022	Inform individually
Registration for admitted students	June ~ July 2022	Aug. 2022	
Semester starts		September 1, 2022	

**Screening criteria** Interview 100% (Face-to-face or ZOOM)

### 5. Document submission and contact

#### Submission

- Address: Room 101, Building 21, Tongmyong University, 428, Sinseon-ro, Nam-gu, Busan, 48520, Republic of Korea
- Email: kimsj@tu.ac.kr

#### Payment of screening fee

Applying course	Amount	Payment account
Master's course	KRW 50,000	부산은행(Busan Bank) 101-2064-1911-05 (Account holder: 동명대학교)
Doctorial course	KRW 60,000	

※ Payment must be arranged upon the submission of application (application will not be accepted without payment)

**Contact** Tel. +82-51-629-3011~2 Fax. +82-51-629-3019

### 6. Tuition and Scholarship

#### Tuition

Course	Affiliation	Entrance fee	Tuition
Master's course	Humanities and Social science	KRW 550,000	KRW 2,548,000
	Engineering / Art	KRW 550,000	KRW 3,261,000
Doctorial course	Humanities and Social science	KRW 550,000	KRW 2,613,000
	Engineering / Art	KRW 550,000	KRW 3,434,000

#### Scholarship

Scholarship	Selection criteria	Scholarship rate
Tongmyong Scholarship	Applicants for one of the following: · graduate from Tongmyong University including Graduate School · recommended by MOU singing organization	Entrance fee exempt
International student Scholarship A	TOPIK 4, IELTS 6.0, TOEFL iBT 85, TOEFL PBT 563, TEPS 600 or more	Tuition 50% reduction
International student Scholarship B	TOPIK 3, IELTS 5.5, TOEFL iBT 80, TOEFL PBT 550, TEPS 550 or more	Tuition 40% reduction

#### Additional fees

KRW 1,900,000 of dormitory fee, KRW 30,000 of immigration registering fee, and etc. will be required to pay after entering Korea

#### Head Office of International Affairs, Tongmyong University

<https://global.tu.ac.kr> Tel. +82-51-629-3011~2 Fax. +82-51-629-3029

Address Room no. 101, Building no. 21, Tongmyong University, 428 Sinseon-ro, Nam-gu, Busan, Republic of Korea

## Dormitory Information

Space with Advanced Life and Educational Infrastructure for TU's Dream and Future

Tongmyong's three residential halls and their amenity-filled facilities provide fun, independent lives filled with passion for student campus living. The first hall is a state-of-the-art global dormitory while the second hall is for the females dorm and the third hall is only for international students. These living facilities and convenient amenities provide individual students with dependent campus living that is second to none.

**Hall No. 1** The newly established Hall No. 1 dormitory is for international exchange type with international students.

**Dorm Capacity :** 238 rooms in 10 story bldg. with 2 basement levels

**Hall No. 2** The Hall No. 2 is established only for female students with a convenient environment.

**Dorm Capacity :** 74 rooms in 6 story bldg.

**Hall No. 3** The Hall No. 3 is established with studio type (one room) only for international students to make further global relations.

**Dorm Capacity :** 39 rooms in 4 story bldg. with 1 basement level

Double Occupancy

Fitness Room

Single Occupancy

Multipurpose Space

Fitness Room

Kitchenette

Reading/Study Room

Fitness Room

Table Tennis Room

Laundry Room

### School of Artificial Intelligence

- | Artificial Intelligence Major
- | Information, Communications & Software Major

#### AI Department of Artificial Intelligence Leading the Convenient World

The Core of Fourth Industrial Revolution - Artificial Intelligence [AI], Information and Communication Software. The AI department leads the AI major in artificial intelligence, which is centered on artificial intelligence, and information and communication software major in the next generation of communication including 5G. The core of the fourth industrial revolution is artificial intelligence and information and communication technology. Information and communication software is a technology that delivers and generates various data and information using information and communication technologies such as the Internet of Things and networks. Artificial intelligence is a machine with human intelligence that effectively manages, analyzes, and judges data. By completing a variety of artificial intelligence-related subjects, you will graduate with a major in information and communication software. The AI department aims to foster key talents in the field of specialized artificial intelligence that will lead the fourth Industrial Revolution. Also, it is selected as SW-centered university and offers various benefits such as scholarships and US IT training.

<http://cse.tu.ac.kr>

### School of Computer Engineering

- | Department of Computer Engineering
- | Department of Software Convergence

#### IT – Key drivers of the software convergence world

The School of computer engineering, a key department of IT Study at Tongmyong University, operates practical major education courses linking theory and advanced technology to meet the needs of businesses in the IT field. Gain knowledge of various IT domains, including open-source software, games and graphics, the Internet of Things, smartphone apps, ubiquitous computing, artificial intelligence, computer hardware, software engineering, and developing major skills to acquire practical talent required by the Fourth Industrial Age.

## Part.01

### College of Artificial Intelligence Convergence

<http://game.tu.ac.kr>

#### Department of Game Engineering

We make opportunities in games! Fourth Industrial Revolution by S/W, The game engineering department will take over.

The Department of Game Engineering at Tongmyong University was established as a department to train professionals in the game field through a four-year program for the first time in Busan. We have consistently produced professional game programming professionals and supplied competent game personnel to the entire region and country. Game engineering departments are now working to train excellent game programming professionals and software developers in various content fields to meet the era of the Fourth Industrial Revolution, where all sectors are revolutionized through S/W. Game programming experts refer to those who have the ability to develop game algorithms such as ability to design, code, and implement principles in game programming. The goal of the game engineering department is to foster professional skills that can be active in both the game and IT sectors.

## Part.01

### College of Engineering

<http://automobile.tu.ac.kr>

#### Department of Automotive Engineering

The future is the era of convergence studies

To Produce Future Transportation System through High-Tech Convergence Technology The Department of Automotive Engineering aims to foster design and manufacturing technology and maintenance technology based on the understanding of parts and systems of automobiles which converge in various fields such as mechanical engineering, electrical and electronics engineering, material engineering and production technique. The ultimate educational goal is to produce the next generation of automotive technology and creative automobile specialists.

<http://et.tu.ac.kr>

#### Department of Refrigeration & Air-conditioning Engineering

To Lead the Renewable Energy Revolution, and New Power of Industry

The Department of Refrigeration & Air-Conditioning Engineering applies to fields of life engineering, transportation machinery, storage processing, refrigeration, air conditioning, renewable energy, building machinery, aerospace, precision machinery and advanced medical equipment. The aim of this department is to foster skilled engineers who are able to improve the productivity of machinery and manufacturing to design spatial environment.

**YOUR PRACTICAL EDUCATION!  
YOUR DREAM! YOUR TONGMYONG!**

<http://elec.tu.ac.kr>

#### Department of Electrical Engineering

Green power to brighten the world, development of green energy where humans and technology coexist

In the Department of Electrical Engineering, we study green electric energy, which is essential for human life and environmental preservation today, as well as the IT field by the development of computers and communications. We cultivate experts in the field of green power, which is the core of the energy saving and low-carbon industry. The Department of Electrical Engineering operates a national certification course in the field of green power, and develops practical skills through basic education in the field of electrical engineering and IT, in-depth education in the field of green electricity, and facilitates extensive experiments and practical training.

<http://pl.tu.ac.kr>

#### Department of Port Logistics System

Port Logistics System of Northeast Asia, Cultivating Professionals, Related Hub Logistics

The Department of Port Logistics System aims to foster human resources who can operate and manage port logistics and nonautomated systems. Systematically, the course consists of logistics management skills based on transportation, storage, unloading, and information. Students learn engineering insights and problem-solving abilities throughout practical classes.

<http://me.tu.ac.kr>

### School of Mechanical Systems and Robotics Engineering

| Department of Mechanical Engineering  
| Department of Robotics Engineering

Training creative and convergent mechanical engineering personnel who lead the 4th Industrial Revolution tailored to the needs of industries

The School of mechanical Systems and Robotic Engineering prepares for the forthcoming 4th Industrial revolution(3D Printers, drones, unmanned vehicles, etc.) and develops knowledge and technology to design, manufacture, and operate future mechanical systems (automating machines, robots, automobiles, aircraft, shipbuilding, etc.). The department consists of three majors: mechanical engineering, mechanical design, and intelligent machinery. Therefore, the department learns traditional mechanical engineering, strengthens the foundation, acquires advanced technologies such as reverse design, and 3D printing, and develops technologies for intelligent machines such as robots and drones to explore the future. In addition, to strengthen students' Companies related to mechanical design and production, robots, automobiles, shipbuilding, aviation, heavy industry and manufacturing, graduate schools, state public officials, research institutes, general machinery manufacturers, and parts and materials producers.research with industry-academic cooperation research in the industry academic field. The School of Mechanical Systems and Robotics Engineering develops talented people who will lead the high-tech mechanical engineering field required by the 21st century.

<http://eme.tu.ac.kr>

### School of Electronics and biomedical Engineering

| Department of Electronic Engineering  
| Department of Biomedical Engineering

Development of electronics-based IoT mobile healthcare soft power engineers

The School of Electronics and biomedical Engineering is the leading department in the era of the Fourth industrial Revolution. The Department consists of two makors: Electronic Engineering, Biomedical Engineering. The Electronic Engineering major trains embedded sysmtems specialists and IT convergence technology Practitioners preparing for the era of smart homes, smart cities, and industrial drones. in the Biomedical Engineering major, we train professionals who prepare for the era of wearable devices and smart healthcare by learning engineering technologies such as medical devices, rehabilitation, health and welfare, medical information, biometric information, and medical images. Smart Mobile major trains working-level experts who prepare for the era of smart IOT, mobile networks, and smart cities, which are needed for the Fourth Industrial Revoulution in the hyper-connected era where things are connected to the Internet and mobile.

## Part.01

### College of Engineering

<http://naoe.tu.ac.kr>

### Department of Naval Architecture and Ocean Engineering

Fostering soft power engineers in the field of shipbuilding and offshore plants that will lead the era of the 4th industrial revolution

The Department of Naval Architecture and Ocean Engineering develops basic science and expertise on the design, construction and operation of ships and offshore plants to develop advanced high-value-added ships, offshore plants, and offshore energy, and develop the shipbuilding and offshore plant industry, which is essential for the efficient use of offshore space. We train soft power engineers in the era of the 4th Industrial Revolution to lead. The curriculum of this program consists of a shipbuilding and offshore plant design major track for training ship and offshore plant design engineers and a shipbuilding and offshore system major track for training system engineers necessary for ship and offshore plant operation/management. In addition, we develop/operate a new curriculum focused on industrial demand, such as field training, industry-university convergence courses, and customized training courses for industries.

<http://dme.tu.ac.kr>

### School of Digital Media Engineering

| Convergence Media Engineering Major | Digital Contents Major

Following the development of digital technology, through software. Nurturing experts in future converged media contents using VR/AR

The convergence Media Major trains media convergence technology personnel who utilize convergence media theory, computers, networks, and mobile programming to foster creative high-quality human resources to lead the advanced new media industry. The Digital contents major trains practical professionals who can creatively produce 360 VR, VR virtual reality, AR augmented reality, hologram, media facades, 3D stereoscopic images, and VFX [visual special images] based on 2D and 3D animation.

## Part.01

### College of Business Administration

<http://management.tu.ac.kr>

### Business Administration Major

Cultivating global leaders and managerial talents in the era of the 4th Industrial Revolution in the model of Bill Gates, Masayoshi Son, and Jack Ma

The Business Administration Major cultivates competent global talents who can strategically operate various management organizations centered on companies. By reading the changes in the future environment symbolized by the Fourth Industrial Revolution, we educate through theory and practice in a balanced manner to assure the continuation of the organization and foster future managers who can grow and develop the organization. Furthermore, we provide specialized guidance and support activities to students who want to develop their start-up experience based on fostering entrepreneurship.

<http://management.tu.ac.kr>

### Management Information Systems Major

Training Digital Management Managers to lead the era of the Fourth Industrial Revolution

The Management Information Systems Major is a creative and innovative department that leads the era of the Fourth Industrial Revolution. Business Internet, social networks, big data, intelligent decision support, ICT convergence, e-commerce business models, smart technology, and other rapidly changing business trends require students to incorporate knowledge of future information technology and develop creative and rapid decision making skills.

<http://dl.tu.ac.kr>

### Distribution Management Major

Professional training in distribution information systems, distribution expert with information technology

The Distribution Management Major is a representative distribution specialization department in korea's are showing the strength of Tongmyong and the ability of the Department of Management Information. Revolution and serve the region and the world. Our department introduces customized industry-academic education courses, establishment of distribution practice infrastructure, and specialized education programs to train distribution experts who combine theory and practice in the field of distribution. After developing basic knowledge of distribution management, we train marketing experts with strategic thinking and problem solving skills, e-commerce experts with understanding and utilization of ICT, and supply chain management experts with system thinking and application skills.

<http://dl.tu.ac.kr>

### International Logistics Major

Fostering global logistics experts who will lead the era of the 4th Industrial Revolution

Fostering global logistics experts who will lead the era of the 4th Industrial Revolution The International Logistics Major is a high-tech department of the future to foster global logistics professionals who will lead the era of the 4th Industrial Revolution. The 4th Industrial Revolution is led by innovation in digital advanced technologies such as artificial intelligence (AI), smart factories, and the Internet of Things (IoT), as well as international logistics that manages, operates, and optimizes industries and businesses using these technologies. The Department of International Logistics aims to cultivate professional manpower required in the shipping, port, aviation, logistics and marine industries, finance, MICE, trade, information and communication, and marine cruise industries, as well as global companies that are the innovators of the 4th Industrial Revolution. We operate and provide international and systematic education, research, industry-academia cooperation, international exchange and scholarship support programs. Through this, the department has recorded a high employment rate and academic achievement (10 winning teams at the National University Thesis Contest over the past 5 years), and has a strong global network (student exchange with over 30 universities abroad and dual degree programs) and industry-academic cooperation networks. (100 logistics companies and family business networks in Busan/Gyeongnam)

<http://gb.tu.ac.kr>

#### Global Trade Major

Training trade experts

Trade was the driving force for Korea, which has no natural resources, to achieve surprising economic growth around the world. The contribution of trade professionals played an essential role in economic growth. The Department of International Trade is a department that fosters human resources specializing in trade. Therefore, we aim to train all-around experts in trade by balancing trade practice, trade theory, and language and certificate fields.

<http://gb.tu.ac.kr>

#### Global Finance and Accounting Major

Cultivating talented professionals required by financial institutions and corporations, and global experts in finance and accounting

The Global Finance and Accounting Major aims to cultivate financial and fintech-related professionals with expertise in finance, accounting, and corporate finance who will lead the future Northeast Asian economy, as well as corporate accounting and fund-related professionals. We are producing experts in global IT finance and accounting. In addition, The Global Finance and Accounting Major is an institution that trains professional tax accountants as designated by the Busan Local Taxation Association. Students can be encouraged through industry-academia cooperation in which theories and practices are harmonized, such as practical education and internships through business agreements with financial institutions located in Busan. We are continuing to strengthen our employment capabilities.

## Part.01

### College of Business Administration

<http://ht.tu.ac.kr>

#### Tourism Management Major

Training course for tourism experts with a sense of international business handling

The department's goal is to foster practical tourism & convention professionals and focus on training, and open education for competitive tourism professionals. Based on foreign language skills, we train people who can carry out various tasks by combining international tourism and convention expertise. Accordingly we operate of certification classes such as overseas travel guide, domestic travel guide, coffee barista, sommelier, convention agency, air reservation ticketing, and shipowner technician.

<http://ht.tu.ac.kr>

#### Hotel Management Major

Cultivating creative and practical hotel experts

We offer a curriculum that is strong in hotel practice and can be applied directly at the hotel site. In order to cultivate talented people who can meet the needs of the hotel industry who can be put into the field at the same time as the global hotel market change. We organize curriculum and provide career guidance with a focus on immediate employment.

<http://air.tu.ac.kr>

#### Department of Aviation Service

Fostering talented professionals in aviation service with a global mind and sophisticated manners

The Department of Aviation Service aims to cultivate leading aviation service professionals with a global mind and sophisticated manners. As a service expert in the aviation field, which will lead the era of internationalization, as the world is transforming into one market students learn theories and practices. Our focus is on developing field-working competency as a professional, such as smooth global communication and airline expertise required in the airline service field, interpersonal relationship skills, leadership, global manners, and food and beverage services. In addition, we cultivate practical skills necessary to cultivate the quality of global services such as image making and air broadcasting information so that we can prepare for the future based on the right characteristics.

<http://sw.tu.ac.kr>

#### Department of Social Welfare

Practicum → Internship → Field-oriented, leading to employment, Fostering multiplayers specialized in multi-certificate related to social welfare department

- Overseas internship program in related social welfare centers : short or long term internship program provided.  
We produce practical talents such as social workers, youth instructors, school social workers, mental health social workers, and medical social workers. In the 4th year curriculum, students learn field experience through a long-term practical internship system, so that they gain an opportunity to read the needs and flows of the local community, and develop them as field experts who can be put into the field immediately after graduation. The internship system, which has been continuing since 2009, is currently divided into overseas internships and short- and long-term internships, which is a great advantage of the Department of Social Welfare at Tongmyong University, which enables you to become a preliminary field expert.

## Part.01

### College of Health, Welfare and Education

<http://food.tu.ac.kr>

#### Department of Food Science & Nutrition

Future-oriented department leading a healthier and safer life Teacher Acquisition Course for Elementary and Secondary Schools

Since its establishment as the "Food Industry Department of Dongwon Industrial College" in 1980, the program is a currently The Department of Food Science & Nutrition at the University of Health, Welfare and Education, which has produced excellent graduates for 30 years. Based on the knowledge of food nutrition, food processing manufacturing, and HACCP (sanitation), this department is responsible for working-level food nutrition and science and technology to meet the demands of the future-oriented functional food industry through the development of new functional food resources and food. As a new food industry that has recently incorporated the Fourth Industrial Revolution into AI technology, the main goal is to foster food health care professionals (nutritions), functional food processing experts (food engineers), and HACCP specialists (hygians).

<http://bd.tu.ac.kr>

#### Department of Beauty Care

Promote beautiful well-being and global beauty leaders

Based on the professional perspective and academic understanding of beauty, we introduce alternative medical methods that apply scientific and practical academic characteristics to create a global beauty leader who can advise on healthy life.

<http://cp.tu.ac.kr>

#### Department of Counseling Psychology

Nurturing 21C-type creative counseling experts who are skilled at counseling practice through specialization

The world is rapidly changing and many modern people have difficulty adapting. Infants, children, adolescents and adults are all under stress, and negative emotional experiences such as alienation, isolation, suicidal thoughts, and anxiety, especially due to the conflict in human relationships and the nuclearization of the family, are also increasing. Counseling psychology is a department that trains counseling professionals who specialize in treating people who have difficulty adapting. In 2013, we established counseling labs such as play therapy rooms, art therapy rooms, collective counseling rooms, private counseling rooms, and psychological examination rooms, and as a result have produced trained counselors who are skilled at counseling practices in sites such as local youth counseling and welfare centers, youth training facilities, and hospital clinical practice.

<http://earchi.tu.ac.kr>

#### Department of Architectural Engineering

Producing experts through BIM expert training program that brings life to architecture

The Department of Architectural Engineering trains engineers who have knowledge and practical skills in detailed majors such as architectural structure, construction and materials, architectural environment and facilities, and construction management. The 2014 Local University Specialization Project was selected to train professionals with BIM expertise through Building Information Modeling (BIM) specialist training programs. As a result, the department has the largest building engineering lab in Busan and Gyeongsangnam-do, and the only BIM center in Busan and Gyeongsangnam-do. It operates an independent structural analysis laboratory, structural materials laboratory, architectural environmental equipment laboratory, and architectural information management laboratory.

## Part.01

### College of Architecture and Design

<http://archi.tu.ac.kr>

#### Department of Architecture

Develop global standard architects through BIM characterization and cooperation with overseas architecture universities

The Department of Architecture completed the BIM specialization program over the past five years through the support of the Ministry of Education's specialization project and established it in the curriculum. In the certification process, BIM was evaluated as a major feature and achievement of the training program. Along with this curriculum, the architectural design class in the Department of Architecture is a small group of 15 students, and 1:1 classes are held. It is equipped with facilities such as a design studio open 24 hours a day, a laser cutter, a 3D printer, and a BIM practice facility using a super computer, and has various opportunities such as holding a joint workshop in cooperation with Paris-Belleville University in France. In addition, four-year and five-year courses are run inside the Department of Architecture, allowing you to choose freely, expanding your career options. At the Korea Architecture Competition, the largest competition in Korea, students in the Department of Architecture were ranked 2nd in 2016, 1st in 2017, and were 3 out of 7 main award winners. In the contest, the department is uniquely winning the most awards every year. Based on this, students in the Department of Architecture are employed by the nation's top architectural firms.

<http://interior.tu.ac.kr>

#### Department of Interior Architecture

Specialized knowledge education focused on creating emotional space, design space, and practicing construction

The Department of Interior Architecture teaches practical expertise from design theory to construction practice, developing individual potential creativity, and teaching necessary designs in the field. The Department of Interior Architecture at Tongmyong University, known for its systematic design education through studio tutoring, was established in 2002 and has produced 15 graduates, achieved the highest employment rate for 3 consecutive years, and won 3 awards in various national contests. It is a department with high satisfaction with living and learning with competent faculty and talented students.

<http://vd.tu.ac.kr>

#### Department of Visual Communication Design

Training leaders and skilled art directors in the era of communication through visual language

The Department of Visual Communication Design studies the basic principles of communicating ideas based on visual language and influencing attitudes and behaviors through theoretical education and practice. Department of Visual Communication Design actively responds to the demands of various visual designs required by the rapidly developing information society and trains talented people who will be responsible for establishing globalization across the country.

<http://ind.tu.ac.kr>

#### Department of Industrial Design

Department that combines practicality and art, Cultivating the ability to create rational designs and original sculptures

The Department of Industrial Design aims to foster talented people who will lead the 21st century design industry. We educate you on creating reasonable designs and original sculptures by interpreting design issues in a variety of ways. This produces designers who will enrich our lives by designing consumer electronics, electrical and electronic products, tools and fixtures, household goods, transportation equipment, lighting fixtures, stationery, and fancy goods.

<http://fad.tu.ac.kr>

#### Department of Fashion Design

Creating unique new trends and developing the best fashion professionals

The Department of Fashion Design studies design and related studies on clothes that reveal their own image or personality. It aims to foster future-oriented fashion professionals with creative artistic and hands-on expertise and skills. Through a professional curriculum focused on practice, this department learns not only how to make clothes, but also how to express fashion design, and learns various fashion-related subjects for creative fashion design. In addition, we provide students with opportunities to develop their hands-on experience and sensibility by participating in a number of presentations, contests, and fashion shows, and train fashion professionals with a whole personality to contribute to the fashion industry.

#### Department of Media and Communication

Cultivating next-generation video specialists with both planning and production capabilities in the digital media era / Developing convergent talents with practical skills and personality in the fields of broadcasting, video, media, and smart media

The Department of Media Communication is a department that trains professionals in broadcasting, one-person media, and social media in the 4th Industrial Age. It trains hands-on people in all courses of video production, including directing, planning, filming, editing, writers, and technical directors. In addition, we train professionals to work as reporters or planners in newspapers, broadcasting and Internet media, corporate public relations offices, and cultural contents-related companies. The curriculum focuses on the operation of practical courses in production and consists of social science insights through the theoretical subjects from a communication perspective that supports practical skills.

<http://adpr.tu.ac.kr>

#### Department of Advertising & Public Relations

Professional education that studies the ability to read the world, people and communication

The Department of Advertising & Public Relations is an academic discipline that covers a wide range of social sciences including communication, psychology, and business administration (marketing). The advertising and public relations department aims to "cultivate creative talent that can move people's minds." The Department of Advertising & Public Relations at Tongmyong University operates three detailed majors: online marketing communication, advertising, and PR, and provides theory-based, practical education programs to train experts in the field. To learn more about our department, please search for The Department of Advertising & Public Relations on the Tongmyong University's official YouTube or visit the department's official Facebook page at <https://www.facebook.com/tuadpr>.

### College of Humanities and Social Sciences

<http://gcc.tu.ac.kr>

#### Department of Global Cultural Contents

Fostering experts on convergence of humanities and practical global cultural contents

The cultural content industry, a new growth engine of the 21st century, requires development planning and production marketing personnel in various fields such as film, animation, games, storytelling, characters, festivals, theme parks, and cultural planning. This department is to train cultural contents experts who meet the needs of new future industries. It focuses on creative storytelling through the development of materials from various humanities and understanding of East and West cultures and the need for a deep understanding of Japanese culture and English education related to contents to match the cultural trend of the U.S. The goal is to foster the leaders of the next generation, who have extensive knowledge in theory and practice, to provide academic education based on humanities and languages (English and Japanese), and to foster global cultural talents in the field of cultural content that encompasses the digital society.

## Part.01

### College of Do-ing

#### Korean Language Education Major

Cultivating experts in Korean language education who will lead the global era on the global stage

The Korean Language Education major trains experts in Korean language education who can teach Korean as a second language (KSL) and Korean as a foreign language (KFL). We aim to cultivate the best Korean language education experts through a global learning environment where we can interact with foreign students from various backgrounds, professional professors, and a differentiated curriculum. After completing the Korean language education course, you can automatically obtain a Korean language teacher certificate (Grade 2) and work as a professor, teacher, Korean language textbook and contents developer at domestic and foreign Korean language education institutions.

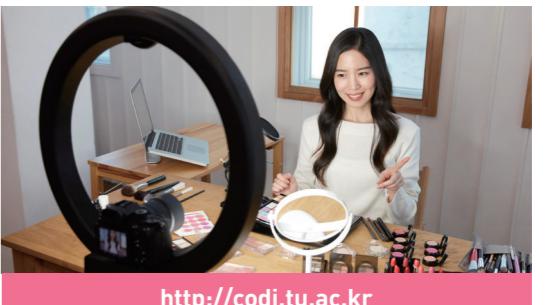

<http://codi.tu.ac.kr>

#### The Digital Performing Arts Major

Do what you want and be the person you want!

The provides an educational environment akin to a playground of performing arts where talented people with the potential to further develop the Korean Wave culture can think and implement freely. Mentors and professors from universities who have succeeded in various fields of performing arts help and guide talented students in the field of performing arts to achieve as experts according to their own goals. become University's major in digital performing arts is a place that makes people who do what they want and who they want to be.

**YOUR PRACTICAL EDUCATION!  
YOUR DREAM! YOUR TONGMYONG!**

<http://codi.tu.ac.kr>

#### The YouTube Creator Major

The star of the "GOLD CREATOR AWARD" is me!

In the era of one-person media, The YouTube Creator Major operates a curriculum to cultivate creative and innovative content creators. It is a major course which trains practical creators by learning strategies and tactics to become a media creator and by cultivating problem-solving skills in the entire process of running a YouTube channel. From design to production and operation of YouTube channels, students will learn to self-directedly execute their own choices, and receive professional and systematic mentoring from leading faculty and creators at home and abroad.

<http://codi.tu.ac.kr>

#### Entrepreneurship Major

Dreams come true! Value is an opportunity! A place where the future is created

Based on the "Disruptive Thinking" required by the era of the 4th Industrial Revolution, entrepreneurs and global management leaders will develop their capabilities. Beyond the framework of traditional university teaching methods, they cultivate creative ideas and entrepreneurial thinking through practical experiences, and experience a new educational paradigm with the guidance of experienced entrepreneurs and professors of start-up/management to acquire and implement practical knowledge such as start-up, marketing, and management strategies.

## DEPARTMENT OF COMPUTERS & MEDIA ENGINEERING

### Educations goals

The graduate school's Department of Computers & Media Engineering aims to cultivate advanced talent who will lead related industries and advanced information society by cultivating in-depth knowledge and research skills in the fields of computers, multimedia, game engineering, and information security.

01

## PART.02 GRADUATE SCHOOL

02

## DEPARTMENT OF ELECTRICAL, ELECTRONICS & INFORMATION COMMUNICATIONS ENGINEERING

### Educations goals

The Department of Electrical, Electronics & Information Communications Engineering is operated with majors in the fields of information and communication engineering, and electrical and electronic engineering, and fosters high-quality talent in the fields of information and communication and electrical and electronic engineering.

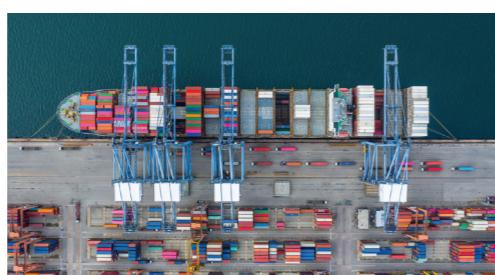

03

## DEPARTMENT OF MECHANICAL SYSTEM ENGINEERING

### Educations goals

The Department of Mechanical System Engineering is a wide range of disciplines covering the interpretation and design of several mechanical systems, including design/manufacturing/control/energy/environmental systems, as well as their manufacture and operation. The Mechanical System Engineering Department develops curriculum suitable for industrial society to develop comprehensive application ability to derive engineering conclusions from the critical engineering fundamentals that form the basis of various fields. To this end, all students shall complete common compulsory subjects, and they shall also be divided into detailed major areas to select and take major courses. In addition, the department actively enables students to acquire creative and leading knowledge by introducing additional new subjects that meet the current trends of academic development.

## DEPARTMENT OF PORT SYSTEMS

### Educations goals

Recently, Busan is taking a new leap forward as an industrial cluster in the construction of a Northeast Asian economy-oriented country. The Department of Port Logistics systematically studies the rapidly changing environment of the logistics system and the ever-evolving port logistics. It aims to study the overall theory of port logistics, which is the junction of maritime logistics and the center of international logistics, from operation and planning to port logistics management, and to cultivate professional manpower necessary for practical work.

04

## PART.02 GRADUATE SCHOOL

**YOUR PRACTICAL EDUCATION!  
YOUR DREAM! YOUR TONGMYONG!**

06

## DEPARTMENT OF ARCHITECTURE

### Educations goals

Architecture refers to the activity of creating all physical environments, including living spaces and urban spaces in which we live. Therefore, architecture is the study of scientific methods to develop a design to create a beautiful and pleasant environment and urban space, and to create a convenient living space. Therefore, the Department of Architecture at Tongmyong University is fostering professional architects who will demonstrate their creative talents in the field of architecture so that architecture can be an activity that enhances people's quality of life and provides cultural richness.

## DEPARTMENT OF ARCHITECTURAL ENGINEERING

### Educations goals

The Department of Architectural Engineering trains top-level faculty members and develops research support facilities in all areas of architectural engineering, including architectural structure, construction and materials, construction IT, architectural environment and facilities, and high-level research personnel who can serve as the backbone of the industry.

Detailed majors include architectural structure major, architectural construction and materials major, architectural IT major, and architectural environment and equipment major. Courses to be completed in each sub-major are established for each subject, and the progress of research is subject to the guidance of the supervisor, and other sub-major subjects can be taken if necessary.

## DEPARTMENT OF HOSPITALITY & TOURISM MANAGEMENT

### Educations goals

With regard to tourism and hospitality, the demand for relevant experts in related fields is increasing, advancement is possible into various fields including national and local government affiliated researchers such as the Korea Culture and Tourism Policy Research Institute, the Ministry of Culture and Tourism, the Ministry of Agriculture, Food and Rural Affairs, professional public officials of affiliated organizations, consulting companies related to tourism development, and related companies.

07

## DEPARTMENT OF BUSINESS ADMINISTRATION (ENGLISH TRACK COURSE)

### Educations goals

The Department of Business Administration fosters future managers who are full of entrepreneurship and can preserve the organization's viability and grow and develop the organization by 'creating' > 'managing' -> 'improving' the changes in the social environment.

08

08

09

10

## DEPARTMENT OF MASS COMMUNICATION & ADVERTISING

### Educations goals

The Department of Mass Communication & Advertising systematically studies various forms of communication phenomena to deepen understanding of society, and further studies and learns theories and practices in major communication fields such as newspapers, broadcasting, movies, information industry, advertisements and public relations. The world of informatisation and knowledge society is developing in a form in which all areas such as politics, economy, society, and culture are fused. Keeping pace with these global changes, the Department of Media and Video Advertising first seeks a future-oriented direction for academics in the media, video, and advertising/public relations fields, and second, fosters professionals who have both theory and practice. Third, it was established to cultivate professionals in the Korean fields of media, video, advertisement/public relations that can contribute to the local community. In addition, this Department of Media and Video Advertising provides practical training as well as theoretical education for new academics and technologies for public relations practitioners who are in charge of public relations at local journals and companies in charge of advertising/public relations, national public institutions, and non-profit social organizations. In order to educate students, a future-oriented curriculum consisting of subjects related to media, video, advertisement/public relations is being established.

## DEPARTMENT OF DESIGN

### Educations goals

The Department of Design is a professional design course that effectively trains ideas and skills that approach the new design problems facing today's world in an experimental and innovative manner. We will learn a wide range of theories and practices in the field of design, but also cross horizontal related studies as well as vertical knowledge and technology to educate students to lead the future society as professionals who possess abundant knowledge and capacities.

The department of design is composed of visual design majors, animation majors, fashion design majors, and industrial design majors, and is actively supporting experimental research activities to enhance field sense and develop professionalism as working designers.

12

## DEPARTMENT OF BEAUTY ART COSMETOLOGY

### Educations goals

The Department of Beauty Art Cosmetology in this graduate school aims to cultivate competent talents who will contribute to the rapidly changing and developing beauty industry as international professionals. The path to cultivating the best beauty experts with original and progressive aesthetics is emerging through systematic professional knowledge and rapid information acquisition, customized education tailored to the needs of the beauty industry, advanced practice, and organic cooperation with the industry. The department aims to establish an education system that fosters experts for not only the local community but also international competitiveness through a realistic curriculum which opens a variety of differentiated major courses suitable for the internationalization and information age, and divides various aesthetic areas of life by major.

11

## DEPARTMENT OF GLOBAL HUMANITIES CONTENTS

### Educations goals

This department analyzes the traditional cultural contents of East Asian and Anglo-American cultures on the basis of the humanities, and analyzes the trends of popular cultures and cultural consumers enjoying cultural contents centered on specific topics. In addition, seminars for researching and discovering various subjects related to religion, philosophy, and literature, and individual topics related to specific authors, works, and literary trends at home and abroad are conducted in-depth, analyzed, and studied for their applicability. Furthermore, the department studies various storytelling styles such as movies, animations, cartoons, and literature using various texts according to relative periods, writers, and styles.

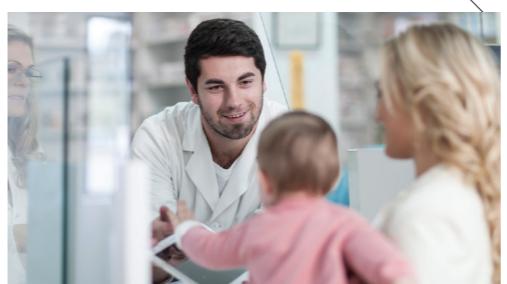

## DEPARTMENT OF BEAUTY ART COSMETOLOGY

### Educations goals

The Department of Beauty Art Cosmetology in this graduate school aims to cultivate competent talents who will contribute to the rapidly changing and developing beauty industry as international professionals. The path to cultivating the best beauty experts with original and progressive aesthetics is emerging through systematic professional knowledge and rapid information acquisition, customized education tailored to the needs of the beauty industry, advanced practice, and organic cooperation with the industry. The department aims to establish an education system that fosters experts for not only the local community but also international competitiveness through a realistic curriculum which opens a variety of differentiated major courses suitable for the internationalization and information age, and divides various aesthetic areas of life by major.

13

## PART.02 GRADUATE SCHOOL OF WELFARE INDUSTRY

01

## DEPARTMENT OF SOCIAL WELFARE

### Educations goals

The Department of Social Welfare of the Graduate School of Welfare Industry of Tongmyong University, established in 2011, aims to produce social welfare leaders with outstanding skills in the social welfare field of the local community based on the spirit of the founding of Tongmyong University. In order to become a base for learning practical knowledge and skills, courses for each specific major were duly opened and operated, and a youth welfare course was established according to the students' desire structure.

02

## DEPARTMENT OF COUNSELING & PSYCHOLOGY

### Educations goals

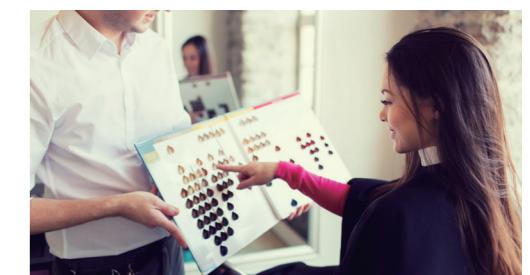

As the world has changed rapidly, many people have difficulty adapting. Infants, children, adolescents, and adults are all experiencing stress, and in particular, many people experience negative emotions such as conflict in relationships, alienation and isolation from the nuclearization of the family, suicidal thoughts and anxiety. In these times, we need counselors who can help people face the challenges they are facing. Our Department of Counseling Psychology at Tongmyong University aims to cultivate practical counseling experts who are competent in counseling practice through practical counseling education based on a deep understanding of human beings through psychology. We will make the world bright and beautiful by cultivating 21C-type creative counseling experts through thorough on-site education according to the industry career roadmap.

## DEPARTMENT OF EARLY CHILDHOOD EDUCATION

### Educations goals

The Department of Early Childhood Education at Tongmyong University Graduate School of Welfare Industry was established in 2011 to practice high-quality early childhood education through theory of early childhood education, practical research, and application to the field. In order to foster creative and excellent early childhood education experts, the program helps students acquire diverse expertise in the field of infant education in depth, focuses on introducing and developing new educational theories, and promotes the development of research and field through continuous interest in and application of infant education. The graduate school's major in early childhood education is aimed at nurturing early childhood education professionals with theory and practice that can contribute to improving the quality of early childhood education and utilizing new theories of early childhood education so that educators can improve and change the educational scene and lead the development of early childhood education.

## DEPARTMENT OF BEAUTY ART COSMETOLOGY

### Educations goals

The Department of Beauty Art Cosmetology in this graduate school aims to cultivate competent talents who will contribute to the rapidly changing and developing beauty industry as international professionals. The path to cultivating the best beauty experts with original and progressive aesthetics is emerging through systematic professional knowledge and rapid information acquisition, customized education tailored to the needs of the beauty industry, advanced practice, and organic cooperation with the industry. The department aims to establish an education system that fosters experts for not only the local community but also international competitiveness through a realistic curriculum which opens a variety of differentiated major courses suitable for the internationalization and information age, and divides various aesthetic areas of life by major.

04

**Mr. CUI RAN**  
(Major in animation)

I would like to show my appreciation to Prof. Kim for supporting me all the time. Due to this guidance and care, I feel like Busan is my second home.

**Mr. Kwon**  
(Dean of International Affairs)

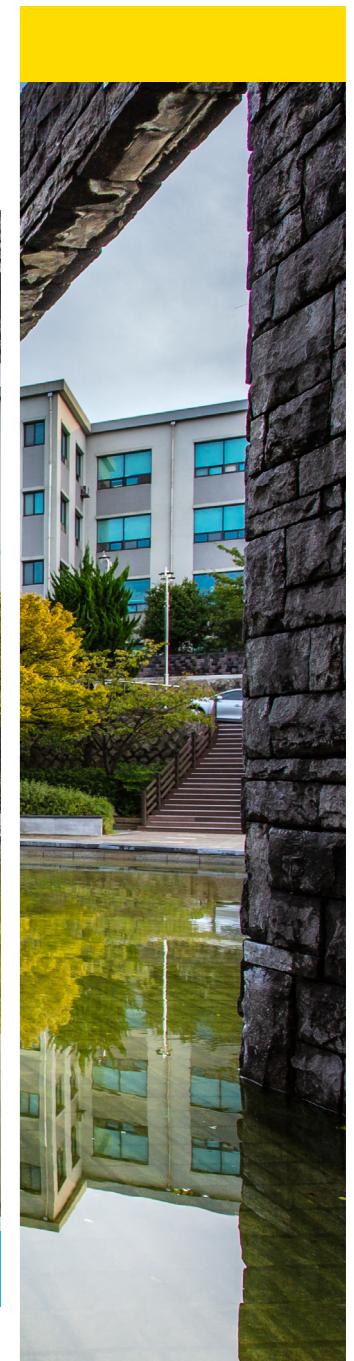

I hope that you will have a life on our campus filled with joy where you can learn future skills and experience the dynamic nature of Korean culture together with us.

**Ms. Trần Nguyễn Ngọc Hoa**  
(Major in intl. logistics)

I think that Tongmyong University changed my life in many positive ways. It was the best choice that I made in my life to come to Busan and study at TU

## School of Artificial Intelligence

Department of Information, Communications & Software Engineering

### Course – English Track

Joint University  
HCMC UNIVERSITY OF TRANSPORT (VIETNAM)

#### Introduction of Major

The School of AI leads the AI major in artificial intelligence, which is centered on artificial intelligence, and information and communication software major in the next generation of communication including 5G. The School of AI will train practical experts with creative application skills through field-oriented practical education required by society as well as artificial intelligence and information and communication fields so that students can become practical experts.

#### The purpose of program

The School of AI cultivates creative talents by leading the information and communication fields such as artificial intelligence, digital content, and broadband communication, which are the core of the 4th industrial revolution and national growth engine.

## International Logistics

### Course – English Track

Joint University  
HCMC UNIVERSITY OF TRANSPORT (VIETNAM)

#### Introduction of Major

The Department of International Logistics is a global logistics specialist designated by the Ministry of Oceans and Fisheries and the Ministry of Commerce, Industry and Energy. It facilitates international and systematic education, research, industry, and scholarship programs to foster future professionals required by shipping, port, aviation, logistics and marine industries.

#### The purpose of program

The goal of the Department of International Logistics is to cultivate dynamic problem-solving talents with integrated knowledge of logistics, ICT, and SMART capabilities.

## Major of Mechatronics Engineering Convergence

### Course – English Track

Joint University  
HCMC UNIVERSITY OF TECHNOLOGY AND EDUCATION (VIETNAM)

#### Introduction of Major

This convergence major is a major curriculum consisting of multinational students to train mechatronics engineers based on the global mind required by the international environment. Therefore, this major will educate students not only in basic knowledge of ICT convergence mechatronics engineering to become future global convergence engineers, but also in knowledge suitable for the Fourth Industrial Revolution, which can become an automation design experts and self-control technology expert.

#### The purpose of program

To cultivate convergent thinking ability, which is a characteristic that connects various fields and concepts well and combines them into creative ideas, and embeds logic circuits and microcontrollers for hardware design and incentivizing work competency to utilize related software that can control hardware. Cultivating engineers capable of system design work.

## International Logistics

### Course – English Track

Joint University  
HCMC UNIVERSITY OF TRANSPORT (VIETNAM)

#### Introduction of Major

The Department of International Logistics is a global logistics specialist designated by the Ministry of Oceans and Fisheries and the Ministry of Commerce, Industry and Energy. It facilitates international and systematic education, research, industry, and scholarship programs to foster future professionals required by shipping, port, aviation, logistics and marine industries.

#### The purpose of program

The goal of the Department of International Logistics is to cultivate dynamic problem-solving talents with integrated knowledge of logistics, ICT, and SMART capabilities.

## Course information of Animation major

### Course – Korean Track

Joint University  
HUANGHUAI UNIVERSITY (CHINA)

#### Introduction of Major

The program introduces advanced global educational learning ideas and practical experiences, such as the Korea Advanced Education Resources, the goal and method of fostering talent in animation Department, the facilitates international students participation in international projects and international competition.

#### The purpose of program

The program will cultivate professional talents in various major fields by focusing on 2D animation, 3D animation, VFX, APP design, and creative animation on the professional characteristics of digital animation.

## + Student Testimonial of international logistics course

### Q. Why did you choose 2+2 program at Tongmyong University?

**A.** Most importantly, I have been interested in Korea for a long time, such as Korean culture, language, and climate, and I chose this program because of the high demand for employment in the logistics sector in Vietnam. I chose it because I thought I could achieve everything I wanted through the 2+2 program of Vietnam University and Tongmyong University.

Internship Program

### Q. How is life at Tongmyong University?

(Class, dormitory, life, memorable activities, etc.)

**A.** The most memorable thing in Tongmyong University is living in a beautiful city called Busan and living in a dormitory. In our university, not only dormitories, but also school restaurants, educational facilities, and rest areas provided an environment for international students to concentrate on their studies, and it was very good that we could always get help if we had difficulties or difficulties through the International Exchange Center. And during my college life, I had a chance to learn more about Korean culture through volunteer work and exchange programs with Korean students.

Class for Major

### Q. What are your future plans after graduation?

**A.** I want to get a master's degree after my bachelor's degree at Tongmyong University, and after that, I want to get a job related to logistics and work using the knowledge I have learned.

Class for Korean language

Athletic meet

Experiencing Korean Culture I

Experiencing Korean Culture II

# COME FIND YOUR FUTURE

## TONGMYOUNG FACTS

1. No1 Do-ing University for International Students
2. TONGMYONG is INSTITUTION ACCREDITATION BY THE MINISTRY OF EDUCATION PREPUBLIC OF KOREA
3. Over 95% International Students Satisfaction level (2021)
4. Great support system for international students  
(The Head office of International Affairs)
